Professional Experience

Junior Software Developer, *DeepOrion Technology Private Limited, Bangalore*   06/2024 – present
Bengalurur, India
- Developedresponsive web applications using **React.js**.
- Collaborated with teams to build **REST APIs** and integrated them seamlessly with the frontend using **SDK**.
- Improved **page load speed by 20%** through code optimization and performance enhancements.
- Utilized **Redux** and **RTK Query** for efficient state management and data fetching.
- Applied **TypeScript** to ensure robust, maintainable code, reducing runtime errors.

Education

Electronics and Communication,   2018 – 2022
Poojya Doddappa Appa College of Engineering (8.1 CGPA)   Kalaburagi, India

Skills

ReactJs, NodeJs, ExpressJs, MongoDB, TypeScript

Projects

BuildX   present
- Worked on a **Shopify-based web application**, focusing on frontend development.
- Utilized **Redux Toolkit (RTK Query)** for efficient API fetching and centralized state/API management and Styled the application using **Tailwind CSS** for a clean and consistent user interface.

Authentication & Backend Services Library
- Developed 100+ backend features using Node.js and TypeScript.
- Implemented features like authentication, coupons, cart, and integrations (Google, Zoom).

Ecom Admin
- Developed a fully responsive admin dashboard using **React** and **TypeScript**.
- Ensured **type safety** across the project by leveraging TypeScript.
- Integrated **RESTful APIs** from the backend to fetch and manage dynamic data.
- Implemented **state management** using **Redux** for consistent and scalable data flow.
- Resolved UI/UX and functional **bugs** to improve overall performance and user experience
